

EMERGENCY SPILL RESPONSE

TUTTLE, OKLAHOMA

NOVEMBER 2021

Rose Rock was called upon to provide emergency spill response services at an oil and gas midstream facility in Tuttle, OK. A crude oil pipeline pump experienced a leak and needed to be cleaned immediately. Our qualified team arrived at the site and after assessing the spill, began power washing all equipment. We used our in-house remediation product, EcoGreen, to safely clean and remove all oil from the equipment as well as from the soil below. Rose Rock was able to have the site fully remediated the same day, helping our client resume their services quickly.
