

MUNICIPAL WASTE COLLECTION EVENT

McCLAIN COUNTY, OKLAHOMA
OCTOBER 2022

Rose Rock partnered with a municipality in central Oklahoma to host a household hazardous waste collection event. Residents of the municipality were able to drop off their waste over a six-hour span to our team. Rose Rock's properly trained and certified team sorted and characterized all collected items into waste collection containers that we provided. All waste streams were assessed and waste profiles were established, as necessary, for recycling or disposal. Types of waste collected from the event included latex paints, ewaste (televisions, laptop computers, etc.), and more. All items were transported from the event in order to be properly disposed of, and the municipality received executed, signed manifests and a full project report within thirty days of event completion.

Consulting • **Field Services** • Products

Spill Response • **Waste Management** • Facility Decontamination • Site Investigations • Transportation Services
