

SOLID WASTE DISPOSAL

SOUTHERN OKLAHOMA

AUGUST 2021

Rose Rock partnered with a Tribal Nation in southern Oklahoma to dispose of their accumulated solid and liquid waste. Our properly trained and certified staff worked to provide waste characterization services, on-site assessments, and removal without the need for sub-contractors. We provided any and all necessary waste collection containers and established waste profiles for proper recycling or disposal. Rose Rock also provided the Nation fully executed, signed manifests for their records within thirty days of waste shipment in addition to the preliminary manifest upon removal. Types of waste from this project included latex paint, oil-based paint, cleaning chemicals, used oil, pesticides and herbicides, batteries, and more. Rose Rock provided all necessary labels and pertinent documentation related to the project, complying lawfully, to complete waste transportation and disposal to ensure the event was a success for the Nation.

Consulting • **Field Services** • Products

Spill Response • **Waste Management** • Facility Decontamination • Site Investigations • Transportation Services
