

INDUSTRIAL PARTS CLEANING USING ECOGREEN

OKLAHOMA COUNTY, OKLAHOMA
MAY 2023

Rose Rock's EcoGreen is used by an oil and gas manufacturing company at their facility in Oklahoma City. EcoGreen, an EPA-certified surface washing agent, is utilized at a 2% solution as part of the manufacturer's industrial parts washer, cleaning all sizes of valves and other parts. The EcoGreen product cleans the parts thoroughly without leaving behind any stickiness or tackiness on the metal parts. This is an ongoing, daily cleaning activity for the OKC-based operation.
