

# LIMITED ENVIRONMENTAL SITE ASSESSMENT REPORTS

TEXAS & LOUISIANA  
MAY 2022

Rose Rock was retained by a consulting firm to conduct Limited Environmental Site Assessments (LESA) on behalf of their client for 128 wells throughout Texas and Louisiana. This review was conducted to assist with environmental risk decisions regarding outstanding compliance issues. We consulted materials from the Texas Commission on Environmental Quality, Railroad Commission of Texas, Louisiana Department of Environmental Quality, Louisiana Department of Natural Resources, the U.S. Environmental Protection Agency WebFIRE database, and the Enforcement and Compliance History Online database to review compliance regulatory information and conducted inspections at over one hundred sites. Throughout the visits, Rose Rock identified 36 spills and provided estimated remediation costs for the client as well as identified gaps in their records and state permitting requirements.
