

CONFINED SPACE ENTRY AND TANK CLEANOUT

CUSTER COUNTY, OKLAHOMA

APRIL 2023

Rose Rock provided confined space and tank cleanout services for a natural gas company in order to assist in their upcoming dismantlement project. Our trained crew provided both the confined space entry and standby technical rescue required for this project. Three storage tanks, two cyclone separators, and a horizontal storage vessel were included in the cleanouts. All necessary permits including pre-plan, entry permit, and job safety analysis (JSA) were completed by Rose Rock and confined space entry and rescue trailers outfitted with "in place" rescue tools were supplied. Upon completion of the tank cleanouts, Rose Rock transported all collected rinsate and impacted soils offsite to be properly disposed of. All of Rose Rock's confined space crew members are trained and recertified annually and all provided services observed OSA requirements.
