

RESIDENTIAL AREA HYDRAULIC OIL CLEANUP

KINGFISHER, OKLAHOMA

MARCH 2023

Rose Rock responded to a call from a state-wide concrete provider who was providing services in a residential neighborhood when their truck experienced a leak, releasing hydraulic oil onto a resident's private driveway. Rose Rock responded the same day to ease the homeowner's concerns and began cleanup immediately. An absorbent boom was placed to keep the impacted area contained, and then the driveway was treated with EcoGreen, Rose Rock's in-house remediation agent, via a powerwasher with a Big Guy spinner attachment. Once Rose Rock completed the remediation, the homeowners were shown the cleanup and gave their approval.
